Walnut Brown

Colors shown are reproduced by the litho-graphic process and may vary from actual colors. Consult product samples for color accuracy. NextStone™ reserves the right to delete or change items in its product line without notice.

**NextStone's™** patented interlocking design hides all fasteners. **No Caulk or Paint is required.** Our weep channel technology allows for airflow, preventing moisture build up. The specially designed silicone molding process and proprietary in-mold coating system chemically bonds to the surface and gives the panels and accessories the look of real rock. NextStone products are made of a uniquely formulated composite polyurethane with ultraviolet inhibitors and fire retardants. The result is a lightweight, durable panel with a realistic rock finish. Backed by a 20 year warranty.

## No Caulk Required!

Tongue and groove top-to-bottom interlock.

Recessed panel back and weep channels.

U. S. Pat. No. 7,748,183
